Kendriya Vidyalaya No-02, SVN, Visakhapatnam
2014-2015                    PERCENTAGE: 89.3%

## Work Experience

### SOFTWARE ENGINEER 1

March 2022 - Present |  1Digitalstack.ai

- Worked on a bid management and analytics product, named Reviniti for players operating in e-commerce platforms. Successfully migrated the legacy codebase from PugJS to React with TypeScript. Implemented efficient state management, authentication, and reusable components
- Currently, my role is to work on developing new features, optimising product performance, resolving active bugs, conducting thorough testing and contributing to the scalability of the product.
- Also, I work on writing data acquisition scripts from multiple channels using nodejs and have active involvement, in integrating new marketplace channels to our product

## Personal Projects

These are some of my selected projects, to checkout more please visit my portfolio website.

### ESHOP: ECOMMERCE APP

**Technology Used:** ReactJS, Firebase, Tailwind CSS, SASS
Collaborated with a friend of, mine to work on a ecommerce application. The major goal was to explore how ecommerce marketplaces work and also, to build a web application, with backend as firebase, without writing apis on our own

### VATAWARAN: WEATHER APP

**Technology Used:** HTML,CSS, JavaScript and jquery
This project is a highly interactive weather application. It displays weekly weather forecast and weather news of the current location and locations searched through search bar. The apps data is extracted from open-weather API.
